6.00 PM Monthly Meeting

Speaker: **Tom Pelc MSTA**
Nomura International Plc

British Bankers Association

Tuesday 21st February 2012

Speaker: **Nicole Elliott MSTA**
Mizuho Corporate Bank

"Using cloud charts in a difficult year: will I do it again?"

A graduate of the London School of Economics and member of the Society of Technical Analysts, Nicole has worked in the City of London for 30 years, trading, in sales and as an analyst within the treasury departments of major international banks. Technical Analysis is always the backbone of her methodology. She is Mizuho Corporate Bank's senior analyst in London and covers the foreign exchange, interest rate, commodity markets and equity indices.

Nicole will begin her talk by briefly going over how the cloud charts work. Then she will go over a series of different asset classes and show how well/badly they performed in 2011, in themselves, relative to opportunity costs and whether the clouds were of any use in predicting the moves. Then she will look at those where the clouds did work well and see if currently these look as though they might actually predict this year's moves as well.

Chairman's Notice
